Software Updates

v1.3 – up-to-date

In the archive since January 10th, 2021

Last update v1.3 released on July 12th, 2020

Download Installationsanleitung DE · Download update v1.3 (.exe, 44.2 MB)

Download update v1.3 (.exe 44.2MB)

Find in the download folder and copy to the desktop

Double click and the software will extract to a folder Bin, and an image file. updW_mcu.img

Copy these to a USB memory stick no larger than 8MB

Name	Date modified	Type	
BIN	10/07/2020 12:12	File folder	3 items
System Volume Information	19/04/2021 08:38	File folder	
updW_mcu.img	12/07/2018 10:13	Disc Image File	

Plug the Memory Stick into a USB port of the radio, making sure nothing is plugged into the other.

Power up the unit and the software should start loading with a progress bar. Once complete, it should give you a menu to choose the language.

Choose the language, unplug the USB and press the OK on screen and the unit should reboot
