## Technical data\*

### REMEMBER

When purchasing a RAPIDO, the unladen weight includes the weight of the vehicle's standard equipment. The unladen weight of motorhomes is determined in compliance with the laws currently in force and includes the vehicle in working order, the driver (75 kg), the gas bottle, fresh water (depending on model: 20 L) and fuel tanks up to 90 % of their capacity with a tolerance of +/- 5 %. All of our vehicles are certified in accordance with Regulation 1230/2012.

It is therefore the responsibility of the user to adjust the load and the number of passengers on board according to the permissible GVW, the payload and the weight of any additional equipment he installed or has had installed in the vehicle.

FIAT chassis: definition of the carriers different from the original commercial definitions of the chassis manufacturers.

Empty weight: the value shown in the catalogue based on a mechanical gearbox and entry level engines without towing capability.

\* All data (weight / measures) are indicated with a tolerance of 5%.

\*\* 5 registered seats without towing capability / 4 registered seats with towing capability ; GVW 3650/4400 kg = 5 registered seats

\*\*\* 4 registered seats without towing capability / 3 registered seats with towing capability ; GVW 3650/4400 kg = 4 registered seats

\*\*\*\* HEAVY chassis: GVW = 4400 kg (150 hp/177 hp) (option at additional cost)

[A] Overall height = +45 mm with HEAVY chassis and/or 16" wheels

[B] GVW 3500 → GCW 5500 ; 3650 → 5650 ; 4400 → 6000 kg

[C] OPTION (additional cost) :

- Fiat 2,3 L - 150 hp

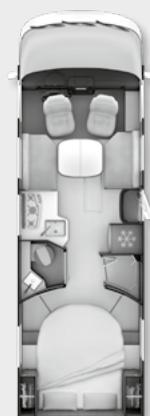

- Fiat 2,3 L - 177 hp

[D] Fresh water tank can be filled up to 120 L and 140 L (883F), which results in a lower payload.

Any accessories installed optionally or by the distributor are not included in the definition of the vehicle's unladen weight. The weight of these elements must therefore be deducted from the vehicle's payload.

# PACKS

## **PACK SELECT**

### *Series 6F, 8F and 8odF*

- ▶ Rear view camera with night vision
- ▶ KENWOOD® multimedia centre with 6.2" screen
- ▶ Passenger air bag
- ▶ Cruise control
- ▶ Electric de-frosting wing mirrors
- ▶ Height-adjustable cab seats
- ▶ Thermal flap blinds for cab doors and runner blinds for windscreen (6F)
- ▶ Thermal sliding, dual-pleat windscreen blind: up/down (sunshade) and down/up (privacy screen) (8F, 8odF)
- ▶ Fixed window on living area door with inbuilt bin
- ▶ Living area door flyscreen
- ▶ Speakers in the living area
- ▶ Cooker hood with LED lighting (Built in: 6F)
- ▶ Automatic Duo Control gas inverter

## **PACK EXECUTIVE**

### *Series 7oF and DISTINCTION*

- ▶ Rear view camera with night vision (Double view on i10)
- ▶ KENWOOD® multimedia centre with 6.2" screen
- ▶ IBS: display showing the remaining battery time left
- ▶ Driver's door with 2-point locking (DISTINCTION)
- ▶ Memory foam mattress topper on permanent bed
- ▶ Leather steering wheel and gear knob
- ▶ KENWOOD® radio controls on steering wheel
- ▶ Radio remote control (on/off, volume and stations) from the bed
- ▶ Thermal flap blinds for cab doors and runner blinds for windscreen (70F)
- ▶ Thermal sliding, dual-pleat windscreen blind: up/down (sunshade) and down/up (privacy screen) (DISTINCTION / electric on i10)
- ▶ ESP with Traction+, ESC and Hill Descent Control
- ▶ Fog lights
- ▶ Stabilising jacks (at the back or in the wheelbase)
- ▶ Chrome-ringed instruments

Your dealer will be happy to give you any further information you may require.

[B] The technically permissible towable mass of the motor vehicle is a piece of information associated with the type approval of the completed vehicle. Based on the towbar that will be mounted on the vehicle and specific values given by the manufacturer of the towbar and the tow ball, the maximum trailer mass that the vehicle can pull may be less. The characteristics of towbar and tow ball resistance (in particular values D and S) are engraved on a plate fixed on it. Value D allows to calculate the maximum permissible mass for the towbar (MPM) with the following calculation:  $MPM = (D \times T \times 1000) / [(T \times 9,81) - (1000 \times D)]$ , with T = maximum vehicle mass (GVW) (in kg) and D = value (in kN) indicated on the towbar. The maximum trailer mass (in kg) is thus less than or equal to the MPM for a maximum towable mass of the vehicle that may be up to 2000 kg.
