16"	195/75R16CP 107Q 215/75R16CP 113Q 225/65R16CP 112Q 225/75R16CP 116Q

Available sizes:

All sizes of Agilis Camping have the standard CP marking. In speed index Q (160 km/hour) and Series 75 - 70 - 65, with the "M + S" marking.

MICHELIN

A better way forward

Technical back-up

1/ Design and technology derived from the new MICHELIN Agilis, with a several seasons' duration (DCP technology - Durable Contact Patch – the contact patch perfectly mastered).

2/ • A reinforced dual-ply architecture enabling you to use higher tire pressures.

Pressure*	
Front	4,5 bars
Back	5,5 bars

* Metallic valves are recommended for these inflation pressures.

- Protected sidewalls: 8 protection bars have been placed on each sidewall of the tire and strengthen the resistance to pavement shocks.

3/ A lamellized sculpture of + 30%* and highly notched + 20%*, combined with rubber functioning in an extended temperature field, resulting in sufficient grip during occasional driving under difficult conditions (track, mud, snow, etc.).

* Compared with Agilis.
